## PROFESSIONAL SUMMARY

Computer Science Graduate and software Engineer seeking to grow in Full Stack and Enterprise Application Development

## PROFESSIONAL EXPERIENCE

<b>Techlogix (Pvt.) Ltd.</b> , Software Engineer	Oct 2025 - Present
<ul style="list-style-type: none"><li>Currently in training and contributing to ALM, and PFT project</li><li>Working with basic ETL Tasks and gaining familiarity with dataflows, data warehousing, and financial risk modules.</li></ul>	
<b>Revolving Games</b> , Full Stack Developer	July 2025 - Sept 2025
<ul style="list-style-type: none"><li>Built features in production apps using React (frontend), Redux Toolkit (RTK) for state management, and Sequelize as ORM, gained exposure to Express.js on the backend.</li><li>Quickly onboarded to ongoing projects and contributed user-facing improvements.</li><li>Proposed and implemented an optimization to minimize redundant state reset methods, which improved state consistency and reduced UI glitches.</li></ul>	
<b>Netsol Technologies Ltd.</b> , .NET Developer Intern	Aug 2024 - Sept 2024
<ul style="list-style-type: none"><li>Created and tested RESTful Web APIs in ASP.NET; implemented small backend modules and queries.</li><li>Learned the basics of Angular and built simple UI components and integrations.</li></ul>	

## EDUCATION

<b>Punjab University College of Information Technology (PUCIT)</b>	2021 - 2025
Bachelor of Science in Computer Science, CGPA: 3.5	

## PROJECTS

<b>Virtual Fashion Fit</b>   <a href="#">Link</a>	
<ul style="list-style-type: none"><li>Developed a virtual try-on application leveraging computer vision and machine learning to simulate realistic garment fitting, applying structured reasoning for human-computer interaction.</li><li>Worked with vision models (VITON) for garment detection and overlay, demonstrating applied AI problem-solving in a real-world scenario</li></ul>	
<b>Gadget Gourmet E-commerce Platform</b>   <a href="#">Link</a>	
<ul style="list-style-type: none"><li>Built a full-stack e-commerce platform for modern kitchen gadgets, focusing on a clean architecture approach for maintainable code.</li><li>Integrated secure checkout, inventory management, and role-based authentication using ASP.NET Core and Blazor to deliver a functional product.</li><li>Ensured a responsive, user-friendly UI with Bootstrap and seamless data management using Entity Framework Core.</li></ul>	
<b>Smart Meters in London</b>   <a href="#">Link</a>	
<ul style="list-style-type: none"><li>Analyzed energy consumption patterns from a large-scale London smart meter dataset, preprocessing over 5 million records using Python, Pandas, and NumPy for modeling readiness.</li><li>Performed feature engineering on time-series and weather data to enhance predictive accuracy of energy usage trends.</li></ul>	

## SKILLS

- Programming Languages:** C, C++, C#, Python, Javascript
- Frontend:** React, Redux Toolkit (RTK), Tailwind CSS, SCSS, HTML/CSS, Bootstrap
- Backend:** Express.js, ASP.NET Core, Entity Framework
- Databases:** SQL Server, Oracle SQL, Sequelize
- Tools:** Git, Github, Docker, Visual Studio, Vscode, Pycharm
- Additional:** Angular (Basic Exposure)
